PROJECTS / YACHTING

DESIGN STATEMENT

Tankoa's management team worked in close collaboration with **Francesco Paszkowski** to design the project and fulfill the following set goals:

- Achieve a perfectly balanced, fluid and timeless design that will not look like what is currently offered on the market.
- Offer perfect circulation flows for owners and guests, providing them with the possibility to move from deck to deck and from inside to outside area without interfering with the working crew, while at the same time giving the crew total freedom of movement to carry on with their tasks.
- Provide a 499 gross ton package for the Owner with amenities and features commonly found on much larger yachts.

PROJECTS / YACHTING

- S501 hull N°1 is a six cabins yacht that includes: main deck full beam Owner and Vip suite, two Vips and two guest cabins on the lower deck, gym, home cinema on the upper deck, a 7-meter tender garage, two jet skis and rescue tender forward. Other amenities include floor to ceiling windows, foldout hydraulic terraces in the owner's suite and on the aft deck increasing the already considerable available space...

Allowing permanent visual contact with the sea was one of the other tasks assigned to Francesco Paszkowski's design team. Interiors, as per client's request, were designed by Francesco Paszkowski Design Studio in cooperation with Margherita Casprini, with particular care of details.

BUILDER STATEMENT

The **Tankoa Vertige S501** is built entirely in aluminum light alloy 5083. Construction has been carefully followed by the project manager and builder engineer Albert McIlroy, the owner's representative. Albert has been responsible for supervising construction of a number of yachts worldwide and mainly in Northern Europe. McIlroy recently declared - "With S501, Tankoa Yachts has greatly improved their time schedule management and operation processes and they truly have a teutonic approach that often leaves me speechless for an Italian builder. I can say, after having supervised the construction of many yachts worldwide, not only the work pace and productivity at Tankoa are superior but it is also probably the first time I see the production schedule fully respected without altering the incredible flexibility that Tankoa is becoming known for." The above mention factor is truly a plus as the Tankoa Yachts organization and business plan, calling for only-the-best subcontractors and suppliers, comes within a package offering typical Italian styling.

PROJECTS / YACHTING

S501, while still under the 500 GRT mark, offers spectacular layout and amenities that include:

- Main deck owner's suite and master's suite. The owner's suite is equipped with two lateral foldout terraces.
- Two Vip and two guest cabins on the lower deck.
- A gigantic aft deck and fly bridge. The aft deck is equipped with an oversized sun pad, a reversed deck salon looking aft and a lateral three meter long foldout terrace to keep guests in contact with the sea.
- Floor to ceiling windows in the main salon with cut down bulwarks providing an excellent view.
- A 7m tender garage.
- Two jet skis and another service tender forward.
- Upper deck TV salon with bar.
- Upper outdoor deck with dining table for 14 guests and wrap-around sofa for up to 20 people with a foldable TV screen.
- Beach club/gym in the transom area.
- Full displacement aluminum hull to reduce both draft and fuel consumption while allowing for easy maintenance.

PROJECTS / YACHTING

ABOUT TANKOA YACHTS

TANKOA Yachts is a project born late in 2008, thanks to a very competent team of managers and investors already involved in the yachting industry, and with a long professional history of successes. Since its inception, TANKOA Yachts' business plan is based on a new philosophy of yacht construction. "Boutique Shipyard" are the most accurate words to describe TANKOA's philosophy, a top quality shipyard focused on yachts ranging mainly from 50 to 90 meters. Limited production, attention to details, use of the latest technologies, precision, rich specifications, ethics and emphasis on Italian building excellence are just a few of TANKOA's values. TANKOA Yachts has opted for "a multi-cultural approach of yacht construction" by integrating various criteria. At TANKOA, the management team is proud to have successfully merged business ethics, high quality precision engineering, and Italian DNA in design and flexibility.

Two experienced and well-known professionals were deeply involved from the first steps of this fascinating industrial history: world renowned and respected designer Francesco Paszkowski, and naval architect Professor Vincenzo Ruggiero. They are working together on the first two yachts of 70 meters, following TANKOA's philosophy guidelines in yacht construction, based on total custom production where quality, exclusivity, precision and reliability are the main focuses.
